

## WindMSG Tutorial #6 (Writing to a Register)

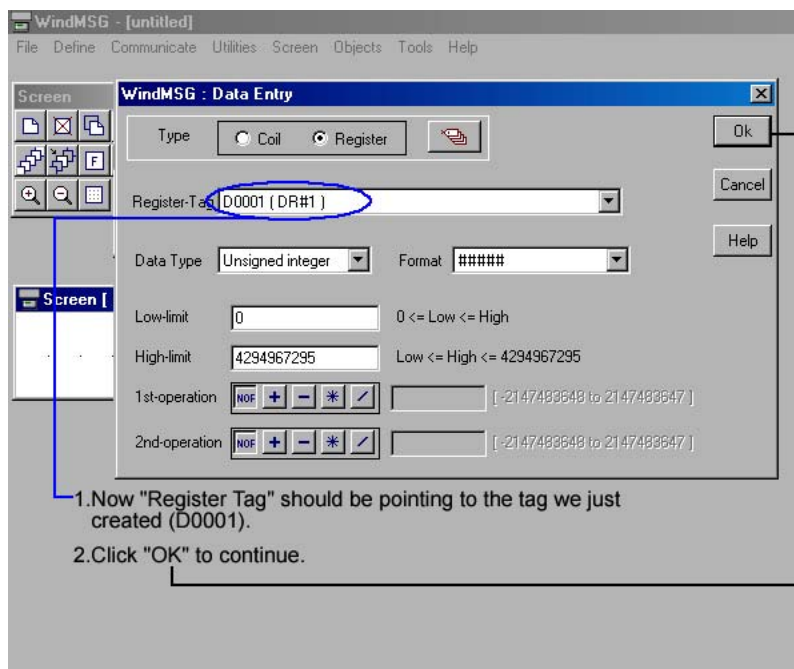

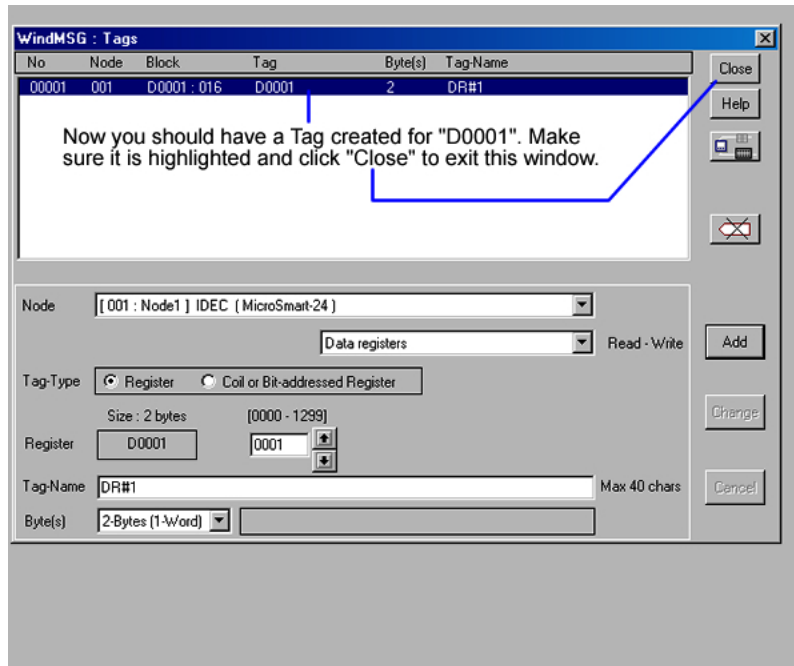

### WINDMSG TUTORIAL PART- 6

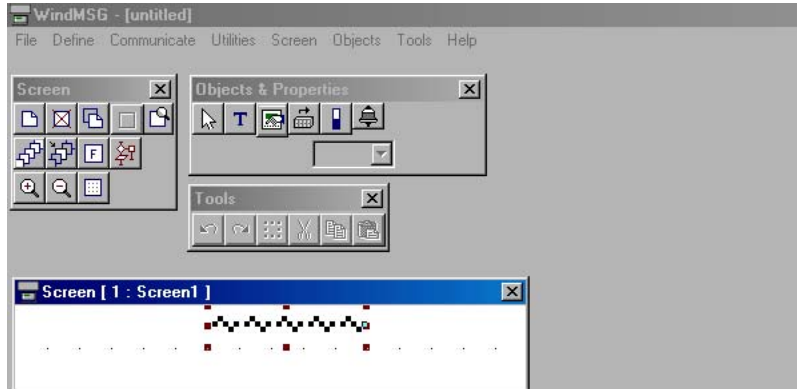

#### WRITING TO A REGISTER

Now your screen area should look like the image above.

Save your program and download it to HG1X unit. After downloading, if you are using HG1X-252 (2-Line Display), use "F3 (Left Arrow)" and "F4 (Up Arrow)" keys to write values to Data Register#1 in the PLC.

Otherwise, if you are using HG1X-452 (4-Line Display) simply use the built-in keypad to write values to Data Register#1.
